# More Security
More Freedom

AhnLab

Our Mission

More Security
More Freedom

We Contribute to Building a Society of Harmonious Coexistence through Continuous Research and Development

AhnLab

Our Values

IMPROVEMENT

We constantly strive to better ourselves, thereby becoming able to help people and society.

RESPECT AND TRUST

We work for the development of our company and ourselves through mutual respect and trust.

CUSTOMER-FIRST

We pay careful attention to the voice of the customer, and a promise made to a customer is always kept.

How We Began

Founder

The genesis of AhnLab began in 1988 when a curious medical school student, Dr. Cheol-soo Ahn, wrote a computer program to remediate the Brain virus, the first computer virus for MS-DOS. Taking off on the "virus" terminology, Dr. Ahn, a medical student at the time, aptly named his program Vaccine, which became one of the first anti-virus programs in the world. He released the program to the public for free to help others who were infected by the Brian virus. He continued to upgrade the program and added the following versions: Vaccine II, V II Plus, and V III, which later became known as V3.

V3 and the idea of helping others became the cornerstone of AhnLab. AhnLab has continuously developed and improved its technologies and products from its V3 family products to its network security solutions and services. For more than two decades, AhnLab has not only been the most established and innovative IT company in South Korea, but it has also become an internationally recognized cyber security company respected throughout the world.

Who We Are

AhnLab

AhnLab, Inc. offers industry-leading cyber security solutions and services for consumers, enterprises, and small and medium-sized businesses worldwide.

Founded in 1995, AhnLab provides comprehensive protection for endpoint, cloud, network, and other services. With its headquarters in South Korea, the most wired country in the world, AhnLab has become a leading innovator of dynamic security solutions that counter cyber threats.

Our technical capabilities, coupled with our extensive experience in the cyber security industry, have created a consistent security strategy-one that not only defeats current attacks, but also creates a secure environment to defend against future threats.

M.B.A., Wharton School, University of Pennsylvania
M.S.E., University of Pennsylvania
Ph.D., Seoul National University

Where We Stand

Today s threat landscape is evolving daily. Attacks become more targeted and more capable of evading security solutions, exploiting weaknesses through social engineering techniques, and setting the stage for long term stealth and espionage.

To secure corporate systems in the age of targeted threats, AhnLab provides a comprehensive product lineup that is capable of defending against a wide range of cyber attacks.

Based on its multi-layered security strategy, AhnLab keeps consumers and businesses secure with an all inclusive security layer that not only defeats today s attacks, but also thwarts tomorrow s evolving threats. That s why more than 25,000 organizations rely on AhnLab's award-winning products and services to make the IT infrastructure safe and reliable for their business operations.

1995

Founded in 1995 as an anti-virus software company

1,200+

More than 1,200 employees, including over 50% R&D personnel

25,000+

More than 25,000 references in various industries worldwide

GLOBAL

Headquartered in South Korea, branch offices in China and Japan

AWARDS

Award-winning, internationally-certified solutions and services

COVERAGE

Comprehensive protection for endpoint, cloud, network, and other services

What We Offer

Solutions Portfolio

AhnLab, a leader in cyber threat analysis, delivers comprehensive, coordinated protection for endpoint, cloud, network, and other services. At every point of entry, AhnLab keeps enterprise networks safe with an all-inclusive security layer.

What Makes Us Different

Core Technology & Infrastructure

AhnLab's technologies and solutions are seamlessly converged into a single platform to cope with evolving cyber security challenges.

In order to provide coordinated protection and practical responses, AhnLab has established a comprehensive threat intelligence platform. AhnLab has been working to develop and apply the latest technologies, including machine-learning and artificial intelligence, to its threat intelligence platform.

With its threat intelligence platform, AhnLab has continuously reinforced its products and services, thereby enhancing its security resilience for customers.

What Makes Us Reliable

Capability

AhnLab delivers coordinated, converged security for our customers. Advanced technologies, exceptional services, and a broad security landscape-the synergetic collaboration gives our customers the peace of mind that comes from fully-protected networks and ensured business continuity.

Advanced Technology
· Machine-learning
· Multi-dimensional threat analysis
· Award-winning solutions

Exceptional Service
· Experts with deep technical knowledge
· "Customer first" support and services

Broad Coverage
· From endpoints and network to cloud
· Software, network appliances, and services

Certification

We provide you with globally-recognized protection.

Our Journey

History

1995
Founded AhnLab, Inc.

1996
Released the official V3, anti-virus product

1999
Established AhnLab Coconut, a managed security services company

2001
Listed on KOSDAQ

2002
Established AhnLab Japan

2003
Established AhnLab China

2006
Acquired a network security company

2010
Released V3 for smartphones

2014
Listed in Gartner Magic Quadrant Report for Enterprise Firewall

2016
Listed in Gartner Magic Quadrant Report for EPP (Endpoint Protection Platform)

2018
Released AhnLab EDR (Endpoint Detection & Response)

2019
Released AhnLab Sefinity Air for SOAR, AhnLab AIPS, and V3 for VDI

2020
Acquired an AI security startup
Released AhnLab CPP
Released AhnLab Office Security

2021
Acquired OT security startup
Released AhnLab Xcanner
Released AhnLab Cloud
Released AhnLab TIP
